Specialization in

- Web Development(php html)(normal expertise)
- Database Management(sql mysql)(Beginner expertise)
- Application Development (c # Java)(normal expertise)

Academic Projects

Developed a database of a car Showroom dealing with new and old/purchased cars.

It was a brief project in which a site was developed and was connected to a database using php and mysql and entries for cars were recorded along with their details.

Final year project.

Worked with Laravel and developed a page named Online auction system in which online auction of things were done.

The project was developed in Laravel a toll used for development of web pages. The site offers a login page for each user to provide an item for auction and to bid for the available items. At a fixed date and time the results were announced and the highest bidder got the item.
